indigow0lf.github.io/ux-portfolio

Software engineer building React and TypeScript applications at Pantheon and independent learning, publishing, and AI projects through Lunara LLC. Brings a UX foundation and experience taking work from product decisions through implementation and testing.

TECHNICAL SKILLS

React · TypeScript · JavaScript · Next.js · Python · GraphQL / Apollo · REST APIs · SQL / PostgreSQL · Supabase · Vitest · React Testing Library · Jest · Git · CircleCI · Java / Spring Boot

EXPERIENCE

Software Engineer | Pantheon · Mar 2025 - Present

- Led development of the Unified Notifications Hub: People's Choice, 1st Place, and Overall, 2nd Place, at the 2026 Pantheon Hackathon.
- Delivered trial-workspace and dashboard flows across authentication, upgrade paths, workspace invitations, and site/environment management.
- Drove an Auth0/OAuth2 login migration, including session-expiry detection and logout behavior; instrumented product events with Segment and Amplitude.
- Migrated dashboard interfaces to shared design-system components, contributed upstream fixes, and built reusable empty states and route-level tests with Vitest and React Testing Library.

Founder / Product Builder | The Lunara Edit (Lunara LLC) · Sep 2026 - Present

- Built and maintain an educational publishing and digital-products platform, connecting editorial content, resource discovery, checkout links, analytics, and publishing workflows.
- Develop learning tools and structured curriculum systems using Next.js, TypeScript, and Supabase, with content validation, automated checks, and human editorial review.
- Own product direction, UX, engineering, publishing, and iteration for an independent resource business.

AI Prompt Engineer (Freelance) | Data Annotation Tech · Jan 2023 - Mar 2025

- Created and reviewed prompts for AI training and evaluation; analyzed, corrected, tagged, and scored model responses.

Software Engineer Intern | Pantheon Platform · Jun 2022 - Aug 2022

- Shipped dependency upgrades and dashboard changes using React, JavaScript, and GraphQL; contributed design-system fixes and refactoring for a router migration.

SELECTED INDEPENDENT WORK

Lunara Quest: Family learning platform with parent planning and learner quests. **Agent Behavior Lab:** Python evaluations with matched controls and paired analysis. More case studies and source links are available in the portfolio.

EDUCATION & ADDITIONAL EXPERIENCE

Tech Elevator · Full-stack Java development bootcamp · Jan - Apr 2022
700+ hours covering Java, Spring Boot, Vue.js, SQL, testing, and Agile development.
Earlier leadership: Manufacturing Supervisor, Schneider Electric (2025); supervised 15-25 production associates.
